

PROFILE

Backend Developer with strong experience in **TypeScript, Node.js, Express.js**, and **NestJS**. Skilled in building scalable and secure **RESTful APIs** using **MongoDB, Mongoose**, and **Prisma ORM**. Proficient in **Next.js** and **Redux** for developing high-performance frontend interfaces. Passionate about writing clean and maintainable code. Experienced in designing modular architectures, integrating third-party APIs, and following best practices for performance and security.

SKILLS

Frontend Development: Tailwind CSS, Bootstrap, TypeScript, React, Next.js, Redux, Framer-motion
Backend Development: TypeScript, Node, Express, NestJS, Next.js RESTful APIs , MongoDB, Mongoose and Prisma ORM
Tools & Integrations: Git, GitHub, Postman, Firebase, Vercel, Figma, SSLCommerz, Nodemailer, AWS , Docker
UI Libraries: Daisy UI, Shadcn UI, Magic UI, Hero UI
Soft Skills: Quick Learner, Teamwork, Self-Motivation, Time Management

PROJECTS

LMS & Digital Marketplace (Backend API)

Repository

Developed a secure and scalable backend API for an LMS and Digital Product Marketplace with role-based access and payment integration.

- Implemented JWT-based authentication, role-based authorization (Admin, Mentor, Student), and Zod validation using a modular architecture.
- Built RESTful APIs for courses, modules, lessons, enrollments, exams, certificates, and digital products using Prisma (MongoDB adapter).
- Integrated SSLCommerz payment gateway for secure transactions and order processing.

Technologies: TypeScript, Node.js, Express.js, MongoDB, Prisma, JWT, Zod, SSLCommerz

Real-time Chat (Backend API)

Repository

Developed a secure and modular realtime chat backend with JWT authentication, protected routes, and chat-based messaging support.

- Implemented JWT-based authentication using Passport.js with protected routes, secure password hashing (bcrypt), and DTO validation via class-validator
- Built chat and messaging APIs with Prisma ORM, enabling message creation and chat-wise message retrieval using PostgreSQL
- Containerized PostgreSQL using Docker for scalable local development and clean NestJS modular architecture

Technologies: NestJS, TypeScript, Prisma, PostgreSQL, Passport.js (JWT), Docker, argon2

E-commerce (Front-End)

Repository

This e-commerce frontend delivers a fast, modern, and visually engaging shopping experience.

- Built a fully responsive and high-performance ecommerce frontend using TypeScript and Next.js, featuring dynamic product listings, category filtering, cart interactions, and smooth navigation with server-side data rendering.
- Implemented an elegant and consistent design system using Shadcn UI, advanced animations with Framer Motion, and global state handling with Redux to manage cart, wishlist, and user flow efficiently.

Technologies: Tailwind CSS, TypeScript, Next.js, Redux, Shadcn UI, Framer Motion.

EDUCATION

Diploma in Computer Science & Technology
Institute of Engineering and Technology, Rangpur
Session: 2021-2022

LANGUAGE

- Bangla (native)
- English (fluent)

CERTIFICATION

Full-Stack Web Development with Prisma ORM
Ostad

Mern Stack Developer
Bdcalling Academy
